

# HP LATEX R2000

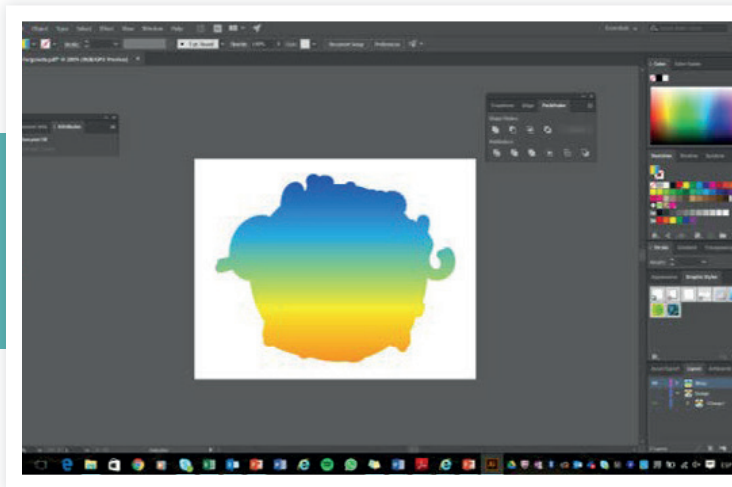

## HOW TO PRINT WITH WHITE IN ILLUSTRATOR

### STEP 1

Open the file you will print using white ink.

### STEP 2

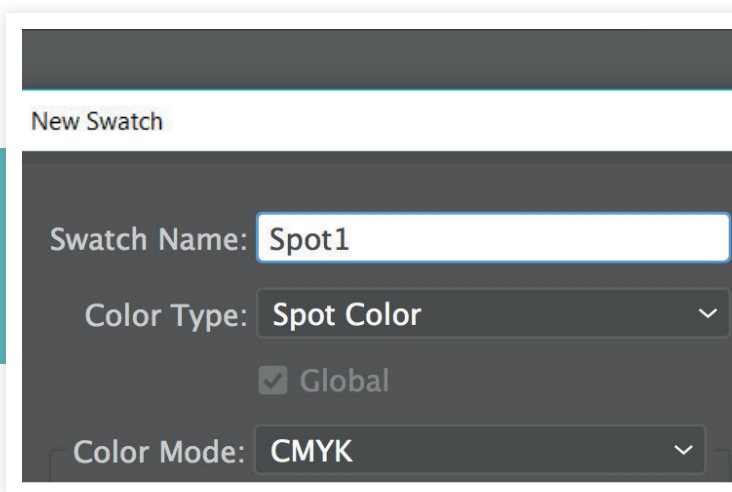

Select and/or create the part of the file that will be filled with white.

**TIP:** Use **CMD+C (Mac) CTRL+C (PC)** to Copy and then **CMD+Shift+V (Mac) Ctrl+Shift+V (PC)** to paste shape in exact same position as the original.

### STEP 3

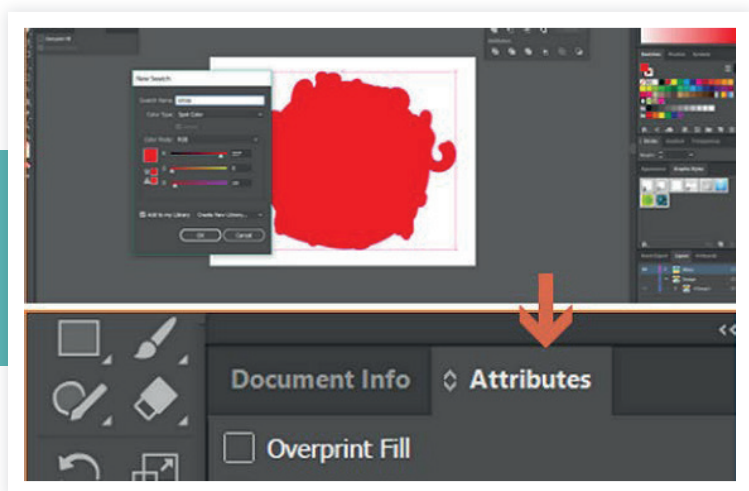

Create a new swatch color as a spot color named Spot1.

# HP LATEX R2000

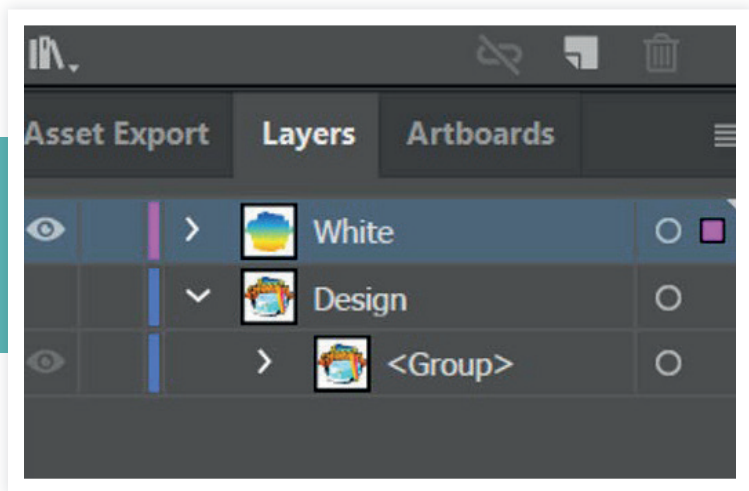

## HOW TO PRINT WITH WHITE IN ILLUSTRATOR

### STEP 4

Fill the white layer with the Spot1 color. Then go to Window/Attributes, and select the Overprint Fill Option

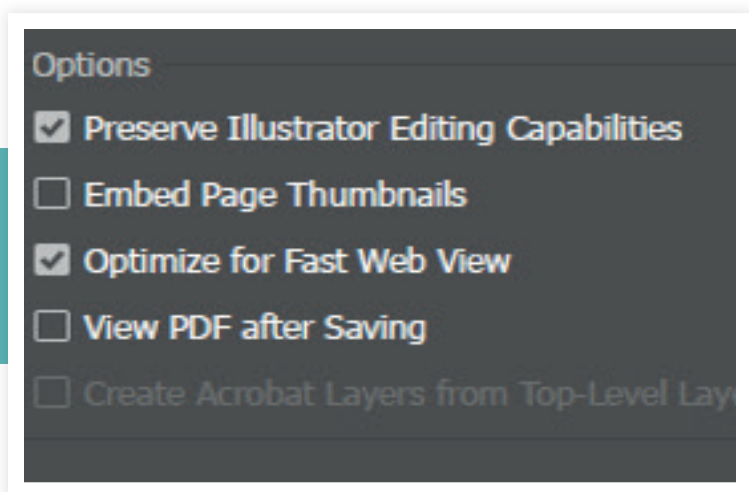

### STEP 5

You must bring the white layer to the front. If not, the RIP won't recognize it.

*TIP:* Use **Object > Arrange > Bring to Front** to bring a layer to the front.

### STEP 6

Save the file as a PDF and select the option to Preserve Illustrator Editing Capabilities.
